PANUWAT PUAKROONGRUENG

SENIOR SAP TECHNICAL SUPPORT ENGINEER | SAP INTEGRATION | INFRASTRUCTURE

+66 86 386 7164
beam_panuwat@hotmail.com
Pathum Thani, Thailand

Availability: Immediate

PROFESSIONAL PROFILE

SAP technical support and integration professional with hands-on experience in SAP PI/PO, enterprise application operations, middleware, Linux infrastructure, and production support. Skilled in end-to-end troubleshooting, interface monitoring, root cause analysis, and cross-functional incident coordination.

CORE COMPETENCIES

SAP PI/PO & enterprise integration
SAP Basis / technical operations
Middleware & application platforms
Production incident & RCA management
Linux, network connectivity & SSL/TLS
Monitoring, availability & performance

EDUCATION

B.Eng. Computer Engineering
Rangsit University | 2016-2022

Science–Math
Suankularb Wittayalai Pathumthani School. | 2010-2016

PROFESSIONAL EXPERIENCE

Gosoft (Thailand) Co., Ltd. | *Jun 2026-Sep 2026*
Senior SAP Technical Support Engineer

- Support SAP enterprise applications, SAP HANA, Java-based application platforms, Linux servers, and middleware services to maintain availability and business continuity.
- Monitor system health and performance across CPU, memory, disk, swap, database memory, application response time, and interface processing; prepare operational reports and technical documentation.
- Own production incidents end to end, including impact assessment, technical analysis, root cause investigation, service restoration, and coordination with application, infrastructure, database, and vendor teams.
- Support SAP PI/PO, SAP Web Dispatcher, communication channels, message processing, and integration flows between SAP, middleware platforms, and external systems.
- Troubleshoot SAP and middleware issues using monitoring and log analysis to reduce operational risk and prevent recurrence.

Honda Automobile (Thailand) Co., Ltd. | *September 2025 - May 2026*
SAP Application Operation & Dealer Support (Outsource)

- Responsible for supporting and operating SAP ERP applications to ensure smooth business operations for Dealers and Business Users in alignment with defined business processes.
- Monitor and maintain system performance, availability, and stability of SAP systems, including root cause analysis to prevent operational impact.
- Provide operational and functional support for users, resolving issues related to transactions, processes, and daily operations, and coordinating with relevant teams until resolution.
- Collaborate closely with SAP Functional teams and support multiple SAP modules, including FI_AP, FI_AR, FI_SD, FI_CO, FI_MM, SAP CRM, and related components.
- Analyze system architecture and contribute to the design of interface and integration flows within the SAP landscape.
- Analyze end-to-end business processes and integration architecture between SAP ERP and Dealer / external systems.
- Participate in the design of interface flows, data mapping, and integration logic to support business requirements.

SELECTED CERTIFICATIONS

1. HCCDA - Tech Essentials on Huawei Cloud (2025)
2. Automated API Testing & Azure Pipeline Integration with Postman (2024)
3. ISO/IEC 20000-1
4. ISO/IEC 27001
5. PDPA Awareness (2023)

TECHNOLOGY

SAP: PI/PO, HANA, Web Dispatcher, SAP GUI, ESB, Integration Builder
Integration: REST/JSON, SOAP/XML, RFC, IDoc, Proxy, File
Platforms: Linux/Unix, AWS, Huawei Cloud
Middleware: Kong Gateway, Apache NiFi, Apache Kafka
Monitoring: Dynatrace, Zabbix, Grafana, Elasticsearch, Kuma
Testing: Postman, SoapUI, JMeter

Charoen Pokphand Foods Public Co., Ltd. (CPF) | *Sep 2022-Aug 2025*

SAP Integration System Engineer

- Responsible for developing and maintaining middleware systems for integrating SAP ERP with both internal and external systems
- Designed and configured integration interfaces using SAP PI/PO and SAP Backend to support seamless communication between various systems
- Planned and monitored end-to-end system connectivity through firewalls and NAT IP to ensure secure and efficient data transfer
- Designed API integration architecture using Kong Gateway, including route configuration, plugin management, and end-to-end data delivery
- Collaborated with SAP Functional teams and gained hands-on experience with various modules such as FI_AP, FI_AR, FI_CO, FI_GL, FI_MM, FI_SD, ERP_MM, ERP_SD, and more
- Designed data mapping flows and transformations between REST/JSON and SOAP/XML formats to support diverse business requirements
- Proficient in various SAP integration methods, including RFC, iDoc, Proxy Class, File, and systems such as SAP ECC6 and SAP S/4HANA
- Conducted API and Web Service testing using tools like SoapUI, JMeter and Postman to ensure system accuracy and performance
- Maintained and optimized systems running on Linux, AWS Cloud, and Huawei Cloud to ensure high availability and operational efficiency
